CERTIFICATE OF ABSENCE OF GMO & GAMMA IRRADIATION

Invertase/Sucrase (*Saccharomyces cerevisiae*)

To Whom it May Concern:

The material contains Invertase/Sucrase from fermentation, standardized with maltodextrin from corn. Enzymology Research Center, Inc. only sources Invertase/Sucrase produced from Non-GMO fermentation. The maltodextrin used may be from a GMO corn source; however, during the production of maltodextrin, the corn DNA is denatured, degraded, or removed. Therefore, corn DNA should not be present in measurable amounts in the maltodextrin used, or in the final Invertase/Sucrase product.

We further declare that the product is not treated with ionizing radiation (gamma rays) or with ethylene oxide (ETO).
